Cats

Cats are small, tame, furry mammals that are often kept as pets and farm animals.

There are over 30 different kinds of pet cats. They have different body shapes and sizes, colouring, fur length, eye colour, tail length, voice and temperament. House cats do not like swimming. Cats like to eat meat and will kill and eat small mammals, birds, fish, frogs, lizards and snakes.

Cats started living with people over 7,000 years ago and still live with us today.
